LAMB FURS HERE

DION GERALDINE OF CHICAGO BUYS 5000 ACRES FROM O. N. MICHELSON.

Kerikal Sheep and Silver Gray Foxe to be Propagated. Sheep Rare Animals.

Olaf Michelson of this place has sold 5,000 acres of land east of Otsego lake to Dion Geraldine, of Chicago. The land will be used for the propagation of silver gray foxes and

Most people have a general knowiedge of foxes but there are few who know the Kerikal sheep. This is a breed of sheep from which are obtained the Persian lamb furs. The lamb is killed when two weeks old at which period the fur is fine and most desirable.

These have been disposed of by the U.S. government to a few responsible men for the purpose of propagation, Mr. Geraidine being one of the men selected for the purpose. These sheep, besides being valued for their turs, are specially hardy and adapted to cold climates and are said to be able to go three months without food. GRAYLING LOSES TO GAYLORD. Game With Regimental Crew Easy Victory.

Last Sunday Grayling humbled themselves before Gaylord in a game of base ball, which was a hard blow for the fans. One of the things that made it bad for Grayling was that they did not have their regular line-up. "Babe" Laurant who hurled for Grayling pitched fine ball, but was not given the support that should have been afforded him. Nos on the mound for Gaylord also pitched good

NEW MOTOR LAW NOW EFFECT IVE.

OSCAR P. SCHUMANN, Editor and Proprietor

An important 1921 law governing automobiles and motor trucks became effective August, 18th, and the state department calls attention to the fact that its provisions will be strictly enforced along with all other laws relating to motor vehicles. In this law enforcement the state department will have the assistance of the public safety department and local officials under the new police organization of the state.

Mirrors must be equipped on all motor trucks when driving outside city limits. The purpose of this re-This winter we will get a lot of pulverized limestone in here, to be used next spring. We have already sold 130 tons and have set our stakes for knowing when automobiles approach them from the rear so that they can drive to the right and permit the faster moving cars to go by. The noise from these trucks makes it impossible in most instances for the drivers to hear horns of automobiles from the rear and thus they hold up the speedier traffic.

That part of the law having to do with the mirrors reads: "Every motor truck, omnibus and all motor commercial vehicles of one and a half tons capacity or more, operating upon the public highways of this state, shall be equipped with a mirror or other reflecting device so adjusted or adjustable that the operator of such truck shall have a clear and full view of the road and condition of traffic behind such truck: provided, however, that the provision of this act relative to mirrors or other reflecting devices shall not apply to cities.

This same act also requires that the tail light of every motor vehicle When this State Fair is over the machine, to display white on tractors and red on all other motor vehicles. tell you, if you want him to, how Every automobile, truck, trailer and semi-trailer must also be equipped with a rear white light sufficient to illuminate the registration plate for SPLENDID MUSICAL COMEDY a distance of at least 50 feet. Making History.

INFANT MORTALITY in past ages has been something frightful, something almost beyond belief, and even today it occupies the time and the mind of leading physicians in all countries. The death rate among infants is being gradnally reduced through new methods of hygiene, new preventatives and new remedies for infants. This reduction in the death rate has NOT been accomplished by adapting the precautions taken and remedies used by adults. Rather has it been to keep clear of the old methods, and choose after long research the precautions and remedies specifically applicable to infants.

This being so, is it necessary for us to caution mothers against trying to give her baby relief with a remedy that she would use for herself? Will she remember that Fletcher's Castoria is strictly a remedy for infants and children?

Nash prices are reduced, since July 2.

This conforms to our statement made last October that Nash prices would be maintained until at least July 1, 1921.

The reasons were plain. Until manufacturing costs were lower we could not cut price without cutting value, as Nash prices were not inflated.

We pointed out then that while the average rise in the price of motor cars for a fouryear period had been 76% the price of Nash cars had been raised but 31%.

This 31% included the addition of cord tires as standard equipment and many other additions and refinements which added materially to the value of Nash cars.

So we re-affirmed our fixed intention of rigidly upholding the high quality of Nash cars

onstrate the remarkable Nash ability to produce fine cars at the lowest possible cost.

Even while working production costs down ward we were improving Nash cars still

Now we can announce a greater Nash value than ever at a reduced purchase price. At the new prices the leadership of Nash State of Michigan, cars is even more emphatically apparent.

MID-SUMMER.

Well, well, here we are in August off on the downhill slide of summe

almost before we have accustomed ourselves to the season.

It was Hawthorne-who somewhere told rather beautifully how in the midst of summer, we find those little evidences which hear in upon our realization the fact that the seines already begun its decline. This season the evidences have come early and the increases there is not considered. ly and the incessant heat; but, even so it is difficult to realize how swiftly the summer's end draws nigh.
With August, coal in the chute rat-

tles more incessantly into the cellar windows of our neighbors, the crick-et is much more insistent with his song at nightfall. Yet, in spite of all that should keep us informed of the significance of fast slipping time, we are a little aghast when of an vening, after a little lull in the norch conversation, someone speaks up and says, "My, how short the days are getting." Somehow, we let ourselves believe, through the first long days getting." Somehow, we let ourselves believe, through the first-long days of summer that days must run the season through, but in reality, the longest days came just about as we are beginning to fully trust the open. No, summer is not over, but the upspringing, joyous development is past. There will be a period of the rounding out and fulfillment, but there is left little more of that fine expectancy which comes with the springtime when we see the world full of uncharted joys. Every garden every rosebud, then, is a veritable fountain of surprises, the like of which we are confident we have never seen befere. But, now, Nature's pageant has paraded past; she may feast our senses with actors more voluptuously garbed, but for all that we have seen the season's caste. We we have seen the season's caste. We know the time for surprises is Thust. There is a little not of sadness, almost indistinguishable, that comes

most indistinguishable, that comes creeping in with midgsummer, with the realization that the season has done its best, and that it is beginning those imperceptible preparations for going on the long black trail which leads to winter. True, cold weather is still weeks away; true some vegetation will flourish and stand bravely green through weeks to come but green through weeks to come, but in we hoped so much thror ... the long

has given us its best.

The sun will blaze hot through the remaining August days, but it is then that come the cooler nights which hint of the stirring time of fall. Here we are over summer's thigh

Tamels are made for Men who Think for Themselves

Such folks know real quality—and DEMAND it

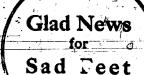

They prefer Camels because Camels give them the smoothest, mellowest smoke they can buy-because they love the mild, rich flavor of choicest tobaccos, perfectly blended—and because Camels leave NO CIGARETTY AFTERTASTE.

Like every man who does his own thinking, you-want fine tobacco in your cigarettes. You'll find it in Camels.

And, mind you, no flashy package just for show. No extra wrappers! No costly frills! These things don't improve the smoke any more than premiums

But QUALITY! Listen! That's CAMELS!

Expediting the Ocean Mails at New York

Under the eyes of Postmaster General Hays, Postmaster E. M. Morgan of New York, and other high officials, a new method-of transferring ocean mails at New York was put into operation. The plan expedites foreign and const-wise mails from 24 to 36 hours. In the past such mails have been-held up until the passengers had been landed, frequently meaning delay of a day or more. Under the new system the New York Central railroad will operate special mail boats to which the mails will be delivered as soon as the vessels arrive at quarantine. The mail boats will rush the matter to the New York post office and to outgoing trains.
